- Trainee Engineer in Amdocs

2022(January-July)

As an experienced engineer at Amdocs, I have honed my skills in providing project support, technical troubleshooting, and optimizing performance and scalability. In addition, I possess exceptional expertise in documenting project requirements, which allows for seamless communication and collaboration among team members.

## PROJECTS

### My Portfolio

HTML, CSS & JS

### Underground Fault Distance Locator

[B Tech Project]

We used an Arduino Uno to reduce circuit complexity and improve the speed and efficiency of our fault locator system.

### Home Automation by voice control using smart mobile.

[Diploma Project]

We utilized smart sensors and IOT technology to create a wireless control system for household appliances that can be easily operated using a mobile phone.
